APPOINTMENTS

- 2012 – *present* **Assistant Professor**, Department of Nuclear, Plasma, and Radiological Engineering, Department of Materials Science and Engineering, Department of Electrical and Computer and Engineering, Program of Computational Science and Engineering, Center for Biophysics and Quantitative Biology; **Core Faculty Member and Group Leader**, Computational Molecular Science Group, Beckman Institute for Advanced Science and Technology, University of Illinois at Urbana-Champaign (UIUC)
- 2010 – 2012 **Clifford G. Shull Fellow**, Neutron Sciences Directorate, Oak Ridge National Laboratory (ORNL)

EDUCATION

- Ph.D.** Nuclear Science and Engineering, **Massachusetts Institute of Technology** (MIT), 2010
Thesis: “*Neutron Scattering Investigations on the Unusual Phase Behavior of Water*”
- B.S.** Electrical Science and Technology, **University of Science and Technology of China** (USTC), 2004

RESEARCH INTERESTS

The research in my group involves both fundamental science and applications of the **extreme/non-equilibrium properties of matter**, with particular emphasis on liquids and soft materials. We synergistically combine *theory-driven atomistic simulations* and *neutron and X-ray experiments*. We strive to push the boundaries of scattering techniques and the statistical and quantum mechanical theory-driven computational methods that intimately connect to the experiments. The goal is to understand **long timescale phenomena and rare events** in matter and engineer them into transformative applications. Our current research can be roughly divided into three areas:

- **Extreme/non-equilibrium properties of liquids** (water, metallic/molecular/ionic liquids, colloids, granular materials)
- **Glassy, jammed, and kinetically trapped soft matter** (heterogeneity, hierarchy, metastability, self-organization, functionality, programmability, controllability)
- **Soft robotics and wearable human-enhancing devices** (Modular Intelligent Self-healing Soft Robotic Arm (MISSRA))

PUBLICATIONS

More than 30 publications (citations > 1200, h-index = 17) in book sections and high-impact journals such as *Phys. Rev. Lett.*, *J. Am. Chem. Soc.*, *Angew. Chem.*, *P. Natl. Acad. Sci. USA*, and *Nat. Commun.* A full list of publications is appended.

AWARDS & HONORS

- 2017.04 **Landis Young Member Engineering Achievement Award**, American Nuclear Society, “*in recognition of his contributions to nuclear and advanced experimental techniques to understand the complex makeup, nature and performance of materials in the far-from-equilibrium state*”
- 2015.05 **Doctoral New Investigator Award**, American Chemical Society Petroleum Research Fund
- 2013.05 Collins Fellow, College of Engineering Academy for Excellence in Engineering Education, UIUC
- 2013 – 2015 List of Teachers Ranked as Excellent (Fall 2013, Fall 2014, Spring 2015, Spring 2017)
- 2010.09 **Clifford G. Shull Fellowship**, ORNL
- 2010.03 Student Research Showcase, Nuclear Science and Engineering Research Expo, MIT

- 2009.10 Best Poster Award, the 15th User's Meeting of National Synchrotron Radiation Research Center, Taiwan, "*Water in the Confined Space: Study of Density Anomalies of Supercooled Water*"
- 2008.05 **Manson Benedict Award**, "*in recognition of the outstanding excellence of your academic and research performance*" and "*for excellence in neutron scattering research, particularly the study of critical behavior of supercooled water*", MIT
- 2008.05 **Neutron Scattering Society of America Prize** "*for cyber development of enhancing the North American neutron community*"
- 2004.07 Distinguished Graduate of Anhui Province, Distinguished Graduate of USTC
- 2003.05 Elected representative of USTC for the Associations of East Asian Research Universities
- 2000.11 Best Paper Award on Modern Chinese Society Research
- 1999 – 2003 Recipient of five scholarships, including **Guo Moruo Scholarship** (2003), **Samsung Scholarship** (2003), Outstanding Student Scholarship (2001), **Lenovo Scholarship** (2000), Outstanding Freshman Scholarship (1999)
- 2002 – 2004 Recipient of nine prizes in international contests in *Mathematical Modeling*, including Interdisciplinary Contest in Modeling (ICM 2003, 2004), Mathematical Contest in Modeling (MCM 2002), INRIA and LIAMA Contests in Scientific Computing Software Scilab (2003)

EDITORSHIPS

- Associate Editor, *Science and Technology of Advanced Materials*, 2016 – present
- Associate Editor, *Frontiers in Materials*, Glass Science section, owned by Springer Nature, 2015 – present
- Associate Editor, *Frontiers in Physics*, and *Frontiers in Chemistry*, Physical Chemistry and Chemical Physics section, owned by Springer Nature, 2015 – present
- Guest Editor, *MRS Advances*, Theory, Characterization, and Modeling section, Fall 2015

INVITED TALKS

More than 40 invited talks at national and international conferences, meetings, workshops, and departmental seminars at peer universities.

1. Keynote Speaker, QENS/WINS 2018, Hong Kong, 2018.07
2. Telluride Workshop on "Water: Grand Challenges for Molecular Science and Engineering", Telluride, Colorado, 2018.07
3. The 12th International Conference on Bulk Metallic Glasses (BMG XII), Seoul, Korea, 2018.05
4. Beckman Institute Director's Seminar, UIUC, "*Hiking on the Energy Landscape – All-Atom Computational Understanding of the Universality of Long Timescale Phenomena and Rare Events in Non-Equilibrium Matter: Metal, Water, and Protein*", 2017.11
5. The 8th International Discussion Meeting on Relaxations in Complex Systems (8IDMRCS), Wilsa, Poland, "*Ioffe-Regel Localization of Acoustic Excitations in Liquids*", 2017.07
6. Theoretical and Computational Biophysics Seminar, Beckman Institute, UIUC, "*All-atom Simulations of the Hierarchical Dynamics of Proteins on the Timescale of Seconds and the Experimental Verifications*", 2017.04
7. Department of Materials Science and Engineering Colloquium, University of Florida, "*Hiking on the Energy Landscape and Counting – Experimental Quantification of the Energy Landscape of Non-Equilibrium Matter: Metals, Water, and Proteins*", 2017.04
8. TMS Annual Meeting, San Diego, CA, "*Quasi-Elastic Neutron Scattering and Machine Learning Studies of the Arrhenius Crossover Phenomenon and Its Correlation with the Kinetic Fragility in Glass-Forming Metallic Liquids*", 2017.02
9. WPI-AIMR Workshop on Structure and Dynamics of Glasses, Tohoku University, Japan, "*Ioffe-Regel localization of the longitudinal acoustic excitations and the Arrhenius crossover regime in metallic liquids*", 2017.02
10. Department of Chemistry, Physical Chemistry Seminar, UIUC, "*Hiking on the Energy Landscape and Counting – Experimental Quantification of the Energy Landscape of Non-Equilibrium Matter: Metals, Water, and Proteins*", 2016.11
11. Department of Materials Science and Engineering Colloquium, University of California Berkeley, "*Hiking on the Energy Landscape and Counting – Experimental Quantification of the Energy Landscape of Non-Equilibrium Matter: Metals, Water, and Proteins*", 2016.10

12. Neutron Electrostatic Levitator (NESL) User Workshop, ORNL, *“Correlation between Fragility and Arrhenius Crossover Phenomenon in Metallic, Molecular, and Network Liquids”*, 2016.08
13. American Conference on Neutron Scattering, Long Beach, CA, *“Energy Landscape Statistics and Coarsening in Liquids and Soft Matter – A Relaxation-Excitation Mode Analysis (REMA)”*, 2016.07
14. The 11th International Conference on Bulk Metallic Glasses (BMG XI), Washington University in St. Louis, *“Quasi-Elastic Neutron Scattering and Machine Learning Studies of the Arrhenius Crossover Phenomenon and Its Correlation with the Kinetic Fragility in Glass-Forming Metallic Liquids”*, 2016.06
15. Institute of Physics, Chinese Academy of Sciences, Beijing, China, *“Quasi-Elastic Neutron Scattering and Machine Learning Studies of the Arrhenius Crossover Phenomenon and Its Correlation with the Kinetic Fragility in Glass-Forming Metallic Liquids”*, 2016.05
16. 40 Years of Neutron Scattering Symposium, NIST, *“Density Fluctuations in Liquids – from rubidium to water, and to complex metallic liquids”*, 2016.02
17. Gordon Research Conference, Neutron Scattering: Effect of Disorder and Disordered Materials, Hong Kong, *“Energy Landscape Statistics and Coarsening in Liquids and Glasses”*, 2015.06
18. NIST Center for Neutron Research Summer School on Fundamentals of Neutron Scattering, NIST, *“Quasi-Elastic Neutron Scattering Analysis of the Relaxation Modes in Liquids and Soft Materials”*, 2015.06
19. National Synchrotron Light Source II (NSLS-II) and Center for Functional Nanomaterials (CFN) Joint Users' Meeting, BNL, *“Energy Landscape Statistics and Coarsening in Liquids – A Relaxation Mode Analysis”*, 2015.05
20. Future and Current Use of Neutron Spin-Echo Spectroscopy in Condensed Matter Research Workshop, ORNL, *“Atomic-scale dynamics of a model glass-forming metallic liquid: on set of activated dynamics and dynamical clustering”*, 2015.05
21. US Army Construction Engineering Research Laboratory (CERL), Champaign, IL, *“Liquids and Glassy Materials”*, 2015.03
22. DOE Workshop on Fundamental Challenges in Our Understanding of the Physics and Chemistry of Water, Houston, TX, *“Coupled Coherent and Incoherent Inelastic Neutron Spectra of Heavy Water”*, 2015.01
23. The Center for High Resolution Neutron Scattering (CHRNS) NSF Review, NIST, *“Emergent Ordering in Multiphase Ionic Materials”*, 2015.01
24. DOE Grand Challenges in Soft Matter Workshop, University of California Santa Barbara, *“Liquids, Supercooled Liquids, and Glasses – Challenges in Understanding Slow Dynamics”*, 2014.05
25. Department of Physics, Condensed Matter Seminar, UIUC, *“Glassy Soft Matter – from Supercooled Water to Protein Preservation”*, 2014.02
26. Berkeley Mini Stat Mech Meeting breakout session, University of California Berkeley, *“Odd–Even Glass Transition Temperatures in Network-Forming Ionic Glass Homologue”*, 2014.01
27. International collaborative online course “Neutrons in Soft Matter Science: Complex Materials on Mesoscopic Scales” invited lecturer, Joint Institute for Neutron Sciences, *“Liquids, Supercooled Liquids, and Glasses”*, 2013.11
28. Department of Materials Science and Engineering, Soft Materials Seminar, UIUC, *“Glassy Soft Matter – from Supercooled Water to Protein Preservation”*, 2013.09
29. School of High Resolution Neutron Scattering to Measure Slow Dynamics, ORNL, *“Reverse Engineering the Slow Dynamics of Supercooled Liquids by Scattering”*, 2013.03
30. Petersen Asphalt Research Conference, Laramie, WY, *“Neutron Scattering for Moisture Detection in Foamed Warm Mix Asphalt”*, 2012.07
31. Department of Food Science and Engineering, University of Tennessee Knoxville, *“Bio-preservation”*, 2012.02
32. Department of Nuclear, Plasma and Radiological Engineering, UIUC, *“A Drop of the Hard Stuff – from Supercooled Water to Complex Materials”*, 2012.02
33. Berkeley Mini Stat Mech Meeting breakout session, University of California Berkeley, *“Observation of Two Dynamical Onset Temperatures of Interfacial and Bulk-akin Water in Metal Organic Framework”*, 2012.01
34. Departments of Physics and Materials Research Laboratory, University of California Santa Barbara, *“A Tale of Two Waters”*, 2012.01
35. Department of Materials Science and Engineering, University of Tennessee Knoxville, *“Phase Transitions and Critical Phenomena – A Curious Case of Water”*, 2011.10
36. Neutron Sciences Seminar, ORNL, *“An Apparent Tricritical Like Behavior of Confined Water”*, 2011.10

37. Center for Molecular Biophysics, ORNL, “*Critical Behavior of Water and Its Impact on the Structure and Dynamics of Biomaterials*”, 2011.09
38. Young Faculty and Research Scientist Seminar, Department of Nuclear Science and Engineering, MIT, “*A Drop of the Hard Stuff – from Supercooled Water to Metallic Glass*”, 2011.03
39. NIST Center for Neutron Research, NIST, “*Unraveling Water’s Secrets*”, 2011.02
40. Department of Materials Science and Engineering, University of Tennessee Knoxville, “*A Tale of Two Waters*”, 2010.03
41. Clifford G. Shull lecture, ORNL, “*A Tale of Two Waters*”, 2010.03
42. Department of Civil Engineering, MIT, “New Insights into the Slow Dynamics of Supercooled Water in Aged Cement Paste”, 2008.11

CONFERENCE ORGANIZATIONS

- Lead organizer, 2018 APS March Meeting Focused Session “Physics of Liquids”, co-organizers: T. Egami, 2018.03
- Co-organizer, ORNL Joint Nanoscience and Neutron Scattering User meeting, 2017.07
- Lead organizer, 2017 APS March Meeting Focused Session “Physics of Liquids”, co-organizers: H. E. Stanley, C. A. Angell, 2017.03
- Co-organizer, ORNL Center for Nanophase Materials Sciences (CNMS) User Meeting, 2016.08
- Member, Advisory Committee, the 11th International Conference on Bulk Metallic Glasses (BMG XI), St. Louis, MO, 2016.06
- Lead organizer, 2015 MRS Fall Meeting Symposium “Liquids and Glassy Soft Materials – Theoretical and Neutron Scattering Studies”, co-organizers: T. Egami, E. L. Liu, H. E. Stanley, 2015.11
- Co-organizer, “Workshop on Topics in Soft Condensed Matter”, MIT, 2015.11
- Co-organizer, ORNL Neutron Sciences User Meeting, 2015.10

OTHER SYNERGISTIC ACTIVITIES

- Panelist, NSF Strategic Planning Workshop on Progress and Prospects for Neutron Scattering in the Biological Sciences, Alexandria, VA, 2018.02
- Reviewer, HFIR/SNS Review of the Instrument Suite for Inelastic Scattering at ORNL, 2017.11
- Member, NIST Center for Neutron Research (NCNR) Beam Time Allocation Committee, 2017 – present
- Member, Program of Computational Science and Engineering Steering Committee at UIUC, 2017 – present
- Member, Users Organization Steering Committee, Advanced Photon Source (APS) at ANL, 2017 – 2020
- Member, Program Advisory Committee, Beckman Institute for Advanced Science and Technology, 2017 – 2020
- Member, Proposal Review Committee, Center for Nanophase Materials Sciences (CNMS) at ORNL, 2016 – present
- Panelist, Neutron Spin Echo for Slow Dynamics Investigations Workshop, 2016.11
- Secretary, Users Executive Committee, Center for Nanophase Materials Sciences (CNMS) at ORNL, 2015 – 2017
- Member, Proposal Review Panel, Center for Functional Nanomaterials (CFN) at BNL, 2015 – present
- Panelist, Spallation Neutron Source Second Target Station Workshop, ORNL, 2015.10
- Panelist, Neutron Measurements for Materials Design and Characterization Workshop organized by NIST, Potomac, MD, 2014.08
- Panelist, DOE Grand Challenges in Soft Matter Workshop, UCSB, 2014.05
- Member, Science Review Committee, Neutron Sciences Directorate at ORNL, 2014 – present
- Panelist, Future Science Impact Meeting, ORNL, 2013.10
- Member, Executive Committee, Spallation Neutron Source and High-Flux Isotope Reactor User Group (SHUG) at ORNL, 2013 – 2015
- Member, Science Highlights Editorial Committee, Neutron Sciences, ORNL, 2012

REVIEW ACTIVITIES

- Reviewer for neutron and X-ray beam time allocations at SNS/HFIR, NCNR, and SSRL

- Reviewer for National Science Foundation, ACS Petroleum Research Fund, Austrian Science Fund, Chilean National Science and Technology Commission, DOE Office of Science Graduate Student Research (SCGSR) Program
- Reviewer for Tenure and Promotion at Tsinghua University
- Reviewer for *Nature*, *P Natl Acad Sci USA*, *Phys Rev Lett/B/E*, *Nat Commun*, *J Chem Phys*, *Soft Matter*, *Phys Chem Chem Phys*, *J Phys-Condens Mat*, *J Phys Chem Lett/B/C*, *ACS Macro Lett*, *Biophys J*, *J of Mater Chem B*, *Nano Lett*, *Nanoscale*, *Langmuir*, *Chem Phys Lett*, *Chem Phys*, *RSC Adv*, *Sci Rep*, *Ann Phys*, *Intermetallics*, etc.

PROFESSIONAL SOCIETY MEMBERSHIPS

American Physical Society, Materials Research Society, Minerals Metals and Materials Society, American Nuclear Society, American Association for the Advancement of Science, Neutron Scattering Society of America, Society for Science at User Research Facilities

TEACHING

The classical and quantum theories of the interaction of radiation (heavy and light charged particles, electromagnetic waves, photons, and neutrons) with matter are core components of nuclear and materials science and engineering. At UIUC, I teach a sequence of four courses at different progressive levels on this subject:

- Part 1. (Undergraduate, Required) *NPRE-446 Radiation Interaction with Matter I*, covers classical mechanics, classical electrodynamics, and quantum mechanics.
- Part 2. (Undergraduate, Required) *NPRE-447 Radiation Interaction with Matter II*, covers nuclear physics including nuclear properties, nuclear force and structure, radioactive decay, interactions of radiation with matter, and nuclear reactions.
- Part 3. (Graduate, Required) *NPRE-521 Interaction of Radiation with Matter*, covers quantitative treatments of single interaction event in atomic and nuclear physics.
- Part 4. (Graduate, Elective) *NPRE-529/CSE-529 Interaction of Radiation with Matter II: Multiple Events and Computational Methods*, covers thermodynamics, kinetic theory, equilibrium and non-equilibrium statistical mechanics, phase transitions and critical phenomena, liquid theory, and atomistic simulations.

The sequence, in the aggregate, aims to provide the students with solid training concerning essential physical principles, mathematical competence, and computational skills.

STUDENTS' AWARDS & HONORS

- 2017.04 Zhikun Cai, Beckman fellowship
- 2017.04 Nathan Walter, Roy A. Axford fellowship
- 2015.08 Abhishek Jaiswal, CSE fellowship
- 2015.05 Abhishek Jaiswal, Block Grant fellowship
- 2014.04 Pawel Piotrowicz, NPRE Outstanding Undergraduate Research Award
- 2014.02 Nathan Walter, Computational Physics Student Summer Workshop fellowship at LANL
- 2014.01 Nathan Walter, NRC fellowship
- 2013.08 Ke Yang, Best Group Presentation Award at ANL/ORNL NX Summer School
- 2013.06 Abhishek Jaiswal, Best Group Presentation Award at NCNR Summer School
